1 Class – January 14

WWI ended on 11/11/1918. William Faulkner wrote, "The past is never dead. It isn't even past." So one century later let's talk about the

four years that changed the world and redefined warfare forever when soldiers started using new mechanized weapons. As always with history, this war has a lot to teach us. How better to try to understand the horror of this catastrophic war than through the words of Erich Maria Remarque's classic novel, *All's Quiet on the Western Front*.

Britain is due to leave the European Union in 2019, but what will happen when it does is still up in the air. Since the referendum of 2016, "Brexit" has raised a string of seemingly unsolvable problems. Will the beleaguered Prime Minister, Theresa May, manage to negotiate a "deal" that satisfies the EU, Parliament, and the warring factions of her own party? Or, will Britain "crash out" of the EU with "no deal", triggering what could be the worst crisis since the WWII? Or, could there even be an "exit from Brexit?"
